February 2012

Objective of AEFCO Programs www.aefco.org

The Aviation Education Foundation of Colorado (AEFCO) is dedicated to introducing High School and College students to Professional Aviation as a potential career after college.

To that end, the Private Pilot Certificate is the basic building block for advancing into a career in Professional Aviation, whether it is a flying career or non-flying career.

AEFCO Student Successes in the Last 12 Months

February, 2011 through January, 2012
